So the answer is A: A computer repair shop owner who opens a second shop across town

an artist who runs a business that paints murals in office buildings and restaurants (Gradpoint)

Which Is a top barrier to physical activity a.fear of injury

b.lack of support

c.lack of confidence

d.all the above

What value of b will cause the system to have an infinite number of solutions?

What is .75 times $1\frac{7}{9}$

NEED YOUR HELP PLEASE!! 30 POINTS Read the passage from *Animal Farm*. As Clover looked down the hillside her eyes filled with tears. If she could have spoken her thoughts, it would have been to say that this was not what they had aimed at when they had set themselves years ago to work for the overthrow of the human race. These scenes of terror and slaughter were not what they had looked forward to on that night when old Major first stirred them to rebellion. If she herself had had any picture of the future, it had been of a society of animals set free from hunger and the whip, all equal, each working according to his capacity, the strong protecting the weak, as she had protected the lost brood of ducklings with her foreleg on the night of Major's speech. Instead—she did not know why—they had come to a time when no one dared speak his mind, when fierce, growling dogs roamed everywhere, and when you had to watch your comrades torn to pieces after confessing to shocking crimes. There was no thought of rebellion or disobedience in her mind. She knew that, even as things were, they were far better off than they had been in the days of Jones, and that before all else it was needful to prevent the return of the human beings. Whatever happened she would remain faithful, work hard, carry out the orders that were given to her, and accept the leadership of Napoleon. But still, it was not for this that she and all the other animals had hoped and toiled. It was not for this that they had built the windmill and faced the bullets of Jones's gun. Such were her

thoughts, though she lacked the words to express them.

How does Clover's response support the author's purpose? Select three options.

- A) Orwell shows that, like the people of the Soviet Union, Clover experiences deep sadness about the violence.
- B) Orwell shows that Clover had hopes similar to those of Soviet peasants—that life would eventually improve.
- C) Orwell shows that Clover discovers she is mistaken in believing that the powerful would protect the weak.
- D) Orwell shows that Clover correctly believes that the rebellion and the takeover of the farm solved the animals' difficulties.
- E) Orwell shows that Clover believes that all of the changes on the farm have been positive changes for the animals.

what undergraduate degree can a student earn at a four-year college (not specific to a field of study)?

How does macduff prove to malcolm that he is trustworthy

What biome covers 45% of earth's surface?

Why are Romans important

Write three equivalent ratios to compare each of the following 5 girls to 6 boys

Zaria wants you to solve this puzzle I am thinking of a number if you divide my number by two and subtract for you will get to what is my number show how you know your answer is correct

Atoms are the smallest particles of a(n) _____, which make up _____. compounds, elements elements, compounds compounds, mixtures mixture, colloids

Why did the Spanish and Portuguese launch voyages of exploration?

What is not true about the sleep cycle? A person can go through the sleep cycle multiple times in one night.

The sleep cycle does not repeat itself in order of 1, 2, 3, 4, and REM.

Deep sleep occurs in the first two stages of sleep.

Dreams occur during the REM stage.

$(7x-20)+(4x)=180$ solve for x

A ratio is comparison of two numbers by addition true or false

According to Erikson, the first stage of development we experience is:

1. Explain the relationship between the following terms. a. Electoral College b. executive branch

It takes an older computer twice as long to send out a company's email as it does a newer computer. Working together, it takes the two computers 10 minutes to send out the email. How long will it take the older computer to send out the email on its own?

1. [Home](#)
2. [More Solution](#)
