The difference between the roots of the quadratic equation $x^2+14x+q=0$ is 6. Find q.

What impulse was delivered to the sled by the friction force from the rough spot?

Explain what is meant by sp^3 hybridization.

Please help me

How did Gutenberg's press revolutionize the way books were made?

A 60 kilogram astronaut weighs 96 newtons on the surface of the moon. calculate the acceleration due to gravity on the moon.

Which personal pronoun correctly completes the sentence? Uncle Steve cooked dinner for _____. A. they B. hers C. we D. us

A journal published a study of the lifestyles of visually impaired students. Using diaries, the students kept track of several variables, including number of hours of sleep obtained in a typical day. These visually impaired students had a mean of 8.888.88 hours and a standard deviation of 2.092.09 hours. Assume that the distribution of the number of hours of sleep for this group of students is approximately normal. Complete parts a through c.a. Find $P(x < 6)$ b. Find $P(8 \leq x \leq 10)$ c. Find the value for which $P(x$

The was like loose window shutters

4. What was a hoplite in ancient Greece??

What fallacy does this argument use?

Diane: As we both know, the population of this country is aging. Elderly people generally prefer not to live in harsh climates characterized by extreme temperatures. Accordingly, in this country's coastal regions, where the climate is generally most temperate, the population is likely to grow, while other regions are likely to suffer population declines. Paul: I disagree. With few exceptions, regions where the climate is harsh are characterized by comparatively low living costs, a compelling factor for retired people with little savings and on fixed incomes.

Which of the following is the most likely point of disagreement between Diane and Paul?

- A. the reason for the population shift toward coastal areas and away from other regions
- B. whether the country's current decline in overall population will continue into the foreseeable future
- C. why older people find certain regions where the climate is harsh attractive places to live
- D. whether regions characterized by harsh climates are likely to experience population declines in the foreseeable future
- E. the extent to which coastal regions are affordable places to live for retired people

What was the main way in which imperialist nations protected their colonies and trade in the 1800s? The imperialist nations built military bases around the world. The imperialist nations required their colonies to raise armies. The imperialist nations armed their merchant ships heavily. The imperialist nations made peace treaties with other nations.

This is the kind of writing that tries to persuade readers to accept authors opinion

Bacteria and viruses are inactivated by temperatures above 139 °C in an autoclave. An autoclave contains steam at 1.00 atm and 100 °C. At what pressure, in atmospheres, will the temperature of the steam in the autoclave reach 139 °C, if n and V do not change?

HURRY PLEASE!!!!!!!!!!!!!! What is usually needed for generating electrical energy when using fossil fuels but not needed when using wind or water?

- A)energy put into the plant
- B)rotating generators
- C)spinning turbines
- D)high-pressure steam
